# HARNESS THE POWER

## OF ADVANCED HRSG TECHNOLOGY

The industry leader in Heat Recovery Steam Generators for gas turbines up to 30 MW, RENTECH offers a full range of HRSG systems to meet your toughest project requirements. We custom engineer our crossflow two-drum and waterwall designs to perform superbly in the most demanding applications and operating conditions. We master every detail to deliver elemental power for clients worldwide.

## ***TO OUR EXISTING & PROSPECTIVE CUSTOMERS:***

*The American Boiler Manufacturers Association (ABMA) is a national trade association representing companies in commercial, institutional, industrial, heat recovery and electricity-generating boilers and combustion equipment. ABMA is dedicated to the advancement and growth of the boiler, combustion and boiler-related equipment industry.*

*The ABMA Member Companies listed in the Buyer's Guide are recognized leaders in their respective market segments, providing innovative products, services and solutions to the most complex of energy and environmental needs. An ABMA member company is not just another steam, hot water or combustion equipment company ... not just another vendor ... each represent a tradition of excellence with an exceptional commitment and obligation to their market segments, customers and the public to provide safe, efficient, clean and reliable hot water, comfort heating, process steam, heat recovery and electricity-generating steam systems.*

*Our Buyer's Guide is a great resource to find companies with a strong sense of corporate responsibility and integrity and a drive to stay current with and connected to tomorrow's solutions to today's challenges.*

*This "Guide" is also available at [www.abma.com](http://www.abma.com).*

*Please let us know how we can enhance this resource in the future and contact us if we may be of further assistance.*

*Sincerely,*

## **BFS INDUSTRIES: A TRUSTED PARTNER FOR OVER 65 YEARS**

Boiler room and diesel generator support equipment represent substantial investments, and they certainly

are not to be taken lightly. That's why, when the need arises, many in the industry turn to one of the most experienced and knowledgeable experts in the field – BFS Industries!

For over 65 years, BFS has provided boiler room and diesel generator support products for industrial applications of all types. Our extensive product line includes packaged deaerator systems, boiler feed/condensate return systems and oil pumping systems. BFS' new division, Critical Fuel Systems, is focused on the fast growing "Mission Critical" diesel fuel market for data centers, hospitals and other emergency back-up power applications.

We've worked hard to meet the diverse needs of our customers, offering quality products backed by the highest level of sales and technical support. Contact us today, and see why we're considered the experts in the industry.

# Steam You Can Depend On...

**Eye-Hye®  
SmartLevel™**  
Boiler Level Indication System

New intelligence “senses the sensors” to notify operators when probes need cleaning

- assures the most accurate, dependable and reliable water level
- eliminates need for frequent blowdowns
- reduces operator exposure to hazardous areas
- expert-verified installation (Free, all-day on-site review to verify compliance to Section I of ASME Code)

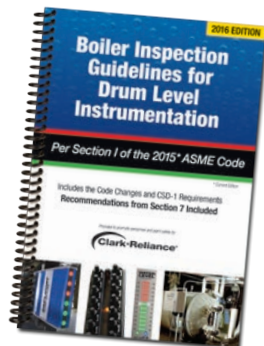

Remote indicators can be located up to one mile from the boiler... designed for efficient communication now and in the future.

# Detroit® Burner Systems

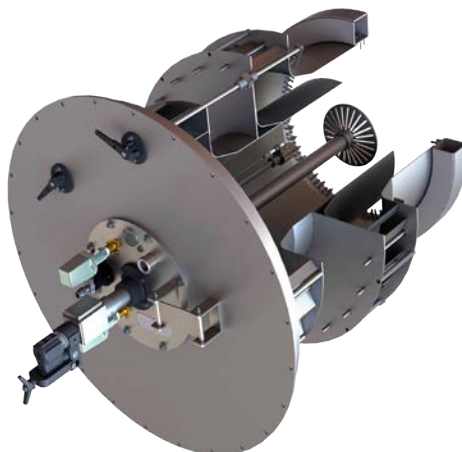

Our performance proven Burner Systems combine high efficiency and reliability as well as meeting virtually all existing federal and state air quality standards, including Boiler MACT. Detroit® Burner Systems include, Low NOx, Vertical Fired, Co-Fired and Auxiliary Burners.

## Low NOx Burners

- Natural gas & oil
- Packaged or field erected boilers
- Auxiliary burners

## Vertically Fired Burners

- Convert coal to gas
- Turnkey retrofits
- Reduced maintenance
- Improved reliability
- Reduced emissions
- Easy installation

## Co-Fired Burners

- Provides proven combustion enhancement in existing solid fuel grate fired combustion systems
- Enhance performance
- Increase efficiency
- Improve load swing operation and turndown
- Lower operating costs
- Recover boiler derate
- Resolve emissions problems

Detroit® Burners are available in standard capacities ranging from 15 to 190 MBtu/Hr and can be installed in multiples to meet virtually any requirement for input capacity or flame length. Every burner is supported by Detroit Stoker Company's worldwide & knowledgeable construction, field service and engineering groups.

## FLAME SAFEGUARD CONTROL

EN 298-2012 Approved

### Features:

- Non-volatile lockout capability
- Proof of fuel valve closure
- Air-flow proving
- Remote and local reset
- Choice of UV scanners
- Check /Run test and calibration aid
- 110VAC and 230VAC models available
- Fast payback with low capital investment
- Functionally compatible with controls in its class
- SMART LED's for status, flame strength and diagnostics

# ***PICK UP STEAM WITH VAPOR POWER***

## **Built to Last**

Vapor Power steam generators, thermal fluid heaters, and electric boilers perform generations. We integrate extensive quality measures into our design and manufacturing process, and our after-market retrofit upgrade kits ensure top-grade performance decade after decade.

With over a century of experience, Vapor Power provides reliable, robust performance combined with customer-centric attentiveness for a trouble-free buying process. To make things even easier, we deliver a tailored system with controls customized to meet your specific needs. Experience the Vapor Power Advantage.

**Rapid Start** approx. 5 min.

**High Turndown Ratios** increased efficiency + reliability = reduced costs

**Compact Size and Weight** more floor space/less expense

**Coil Design** multiple coils with thicker walls

**High Quality Steam** dry steam levels up to 99.5%+

**Reduced Downtime** significantly reduced maintenance

**Burner Placement** easy viewing and accessibility
